Mini-Project Guidelines – 2026

1. Submission of Problem Statement

Each team must identify a real-world problem and submit the problem statement on or before **Lab 04**.

The problem statement document should include the following:

- Title
- Introduction: Write in own words with 150 to 200.
- Keywords: At least 4 to 5 words.
- Objectives: At least two to three.
- Data Source: Mention the reference
- References:

a) Include **20–25 references** from **SCOPUS- or Web of Science-indexed journals**.
b) **Avoid citing conference papers, textbooks, blogs, websites, or other non-peer-reviewed sources.**
c) Preferably use **recent journal articles published from 2020 onwards**.
d) Ensure that all references are cited appropriately in the text and formatted according to the **IEEE referencing style**.

- Names and registration numbers of all team members

Team Size: Three students per team.

2. Mini-Project Evaluation and Report Submission

During the mini-project evaluation, each team must submit a detailed project report containing the following sections:

- Title
- Abstract
- Keywords
- Introduction
- Literature Survey
- Objectives
- Data Source
- Methodology
- Implementation Details
- Results and Discussion
- Conclusion and Future Scope
- References

Front Page Requirements

The front page of the report should contain:

- Name of the School
- Name of the College and its logo
- Project Title
- Names of the Team Members
- Roll Numbers
- Registration Numbers

- Name(s) of the Faculty Guide(s)
- Academic Year

Important Note

The project report will be checked for plagiarism and similarity using **Turnitin software**. The similarity index must be **less than or equal to 15%**.

Report Format

Students must prepare the report using the prescribed IEEE template available at the following link:

https://attend.ieee.org/procomm-2024/wp-content/uploads/sites/580/2024/03/Full-Paper-template.docx
